DISCLAIMER:

The information in this database on "AC:BR", "SS", "PS", "LP" and OJD "MN Status" has been collected by the Association from third party sources. The information in the database serves as a guide to the status of flocks. The Association is not able to confirm the accuracy or the completeness of the information and accepts no liability if, for whatever reason, the information is inaccurate or incomplete. Purchasing decisions should not be made on the basis of the information in the Flock Register or the Association's web site. Prior to any purchase, the current status of the flock should be confirmed by the owner in writing.

Recommendations for the Management of Microphthalmia

The ATSB strongly recommends that:

1. *All Texel rams submitted for registration in future are Microphthalmia tested, unless the animal's sire and dam have both been tested clear.*
2. *Prior to sale or transfer all registered Texel ewes and rams are Microphthalmia tested, unless the animal's sire and dam have both been tested clear.*
3. *Prior to sale, transfer, or export, all Texel genetic material is tested clear for Microphthalmia unless the direct parents are clear tested*
4. *All Texel genetic material imported to Australia is tested clear for Microphthalmia.*

Please note: Members are not being forced to follow these guidelines, the breeder alone is responsible for the animals and genetics sold, however the ATSB recommends these guidelines as good practice.

DESIGNATIONS USED IN FLOCK HISTORIES

- (AC:BR)** The letters (AC:BR) appearing beside a Flock in the Flock Histories, indicates that the Flock is accredited Brucellosis Free as at 31st March 2011 with the Department of Agriculture in each State. State Departments of Agriculture can provide the current AC:BR status of any Flock on request, and intending purchasers should avail themselves of this free service.
- (LP)** The letters (LP) beside a Flock indicate that the Flock claims accreditation with LAMBPLAN.
- (MC)** Beside an animal or flock denotes Microphthalmia clear (i-scan clear)
- (SS)** Indicates flocks claiming accreditation with STOCKSCAN.

Editor's Note:

Flocks claiming "AC/BR" status have provided a current copy of their brucellosis accreditation certificate.

The status of flocks claiming "LP" had not been confirmed by LAMBPLAN while Stockscan status had also not been confirmed at the time of going to press.

Australian Sheep Johnes' Disease Market Assurance Programme (Sheep Map).

Some members have claimed Monitored Negative Status. Please note that this information has not been cross-checked with Animal Health Australia as at May 2011. It is only a guide and before sheep are moved or bought, a purchaser should see the current certificate or a written vendor declaration of status.
